Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 January 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-10 are finally rejected under 35 U.S.C. 102(e) as being anticipated by Shepherd (US 6,705,921).

Regarding claim 1, Shepherd teaches proximity measurement with at least two different tilt angles of the holding element with respect to a planar body's surface, and wherein the proximity measurements results reflect relative position of the tool/sensor with respect to the planar surface (column 4, lines 33-35 and 47-49).

Regarding claim 2, Shepherd teaches computing precise position of a tool/sensor with respect to a holder (column 5, line 62).

Regarding claim 3, Shepherd teaches using a holder with multiple types of actuators or positioning motors, wherein some actuators or motors provide coarse positioning of the holder or tool with respect to the holder and others are capable of achieving higher precision positioning of the holder or of the tool/sensor with respect to the holder (Refs. 146 and 48 and column 6, lines 53-55).

Regarding claim 4, Shepherd teaches computing precise position of a tool/sensor with respect to a holder for at least one predefined position of actuators capable of adjusting position of the tool with respect to the tool holder (column 5, lines 60-65 and column 6, lines 20-22).

Regarding claims 5 and 6, Shepherd teaches that the apparatus contains more than one sensor that responds to proximity, pressure, force, electric field, or any other factors in some extent dependent from relative position of the tool, and these sensors may be arranged in ordered pattern (column 6, lines 8-13).

Regarding claims 7 and 8, Shepherd teaches using data of multiple measurements and computing positions of different regions of a tool or multiple tools/sensors (column 5, lines 60-65 and column 6, lines 20-22).

Regarding claims 9 and 10, Shepherd teaches using data of multiple sensors and computing positions of different regions of tool (column 5, lines 60-65 and column 6, lines 20-22 and 53-55).

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection on the basis of the amendment to claim 1.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
